Objective

The objective of the SPDR® Gold Trust is for the Shares to reflect the performance of the price of gold bullion, less the Trust's expenses.

The Price of Gold

The spot price for gold bullion is determined by market forces in the 24-hour global over-the-counter (OTC) market for gold. The OTC market accounts for most global gold trading, and prices quoted reflect the information available to the market at any given time. The price, holdings, and net asset value of the Shares (NAV), as well as market data for the overall gold bullion market, can be tracked daily at www.spdrgoldshares.com.

Current performance may be higher or lower than that quoted. Visit www.spdrgoldshares.com for most recent month-end performance.

ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns.

Frequent trading of ETF's could significantly increase commissions and other costs such that they may offset any savings from low fees or costs.
